Submission Guidelines

The submission guidelines consists of whatever things you need to turn in during a submission:
1) Report
2) Folder structure

Report:
The Report should be as professional as possible. The report should be written in indirect speech. The report should not be longer than 5 pages. The Index, References, and Project Staffing sections are not counted in the total pages.
0) Index or Table of Contents
1) Executive Summary – In points no more than half a page.
2) Problem Statement and Objectives
3) Approach and methodology of evaluation
   a) Block diagram or Semi-Schematic diagram
   b) Hardware evaluation
   c) Additional evaluations
4) Module test results
5) List of project deliverables
6) Recommendations: GO/NoGO
7) References
8) Project Staffing

Folder Structure:
All modules should have a folder by its name. If a module has a code that needs to be submitted then please submit the code inside the corresponding module folder. The screenshots if required needs to be submitted inside the corresponding modules folder. A maximum of three screenshots can be submitted per module. An additional hardware evaluation folder can be present to have additional hardware evaluation documents and circuits of custom blocks in the semi-schematic diagram. Content outside folders should be the Report and Cost evaluation document.
